

Your strategic partner for forms management excellence

Every day you wait, you fall farther behind.

Right now, manual workarounds, disconnected systems, and inconsistent policy language could be costing you more than you realize. Your competitors that have modernized their forms management may be capturing market share while you're still fighting inefficiency.

Mozart Form Composer® is built specifically for carriers and managing general agents (MGAs). Whether you're managing personal, commercial, or specialty lines, we can help standardize and accelerate your entire forms life cycle—cutting costs, ensuring compliance, and enabling scalable growth without more headcount.

The cost of waiting grows every day

Operational inefficiency means hundreds of lost hours

Your challenge: Multiple platforms and manual workarounds can drain resources daily as your teams spend hundreds of hours annually on tasks that should be automated.

What Mozart delivers:

- Eliminating redundant systems and cut platform expenses
- Bulk updates, version control, and forms comparisons
- Freedom for teams to focus on higher-value strategic work

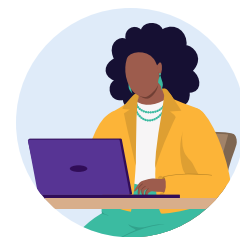

Limited visibility means operating blindly

Your challenge: If tribal knowledge and manual processes make it impossible to track approvals or manage version history, you could be one missed change away from significant risk.

What Mozart delivers:

- Centralized workflows with approvals and change tracking
- Visibility into all forms management activities
- Audit trails that keep you compliance-ready

Leading carriers are already using Mozart® to build their competitive edge managing proprietary and/or ISO forms. The question isn't whether you'll need to modernize—it's whether you'll lead the change or scramble to catch up

Regulatory penalties are escalating

Your challenge: State regulations and ISO forms update constantly. Without audit tracking, you may unknowingly expose your organization to fines, legal exposure, and coverage disputes.

What Mozart delivers:

- Compliance tracking with built-in audit trails
- Policy form updates that are documented and compliant
- Reduced regulatory risk while maintaining business agility

Inconsistent language leads to claim disputes

Your challenge: Fragmented form management can create language inconsistencies that multiply claims disputes and escalate legal costs.

What Mozart delivers:

- Consistent policy language across all documentation
- Reduced underwriting risk through standardized forms
- Improved claims outcomes with clear, precise coverage language

Leading carriers choose Mozart

- ✓ **Fast implementation**
Intuitive interface with minimal IT lift delivers value almost immediately
- ✓ **Custom integration**
Robust API connects with your existing infrastructure
- ✓ **Scalable growth**
Expansion is enabled without adding headcount
- ✓ **Industry leadership**
Partnership with Verisk sustains your competitive advantage through continued innovation

It's time to act

Every quarter you delay, the competitive gap may widen. Tomorrow's market leaders are making this decision today.
