

Claims Video Capture

Your single source of accident truth

Every day, you're challenged to determine what really happened in vehicle accidents. Unreliable witness statements, untruthful drivers, and hard-to-obtain camera footage make it time-consuming to resolve claims accurately and fairly, especially with bodily injury cases.

As part of Verisk's ClaimSearch® Partner program, Claims Video Capture now delivers real-time video coverage of intersection accidents right to your desktop within ClaimSearch, helping you:

Determine liability accurately and fairly, reducing litigation risk and protecting your policyholders

Streamline adjudication and minimize expenses by eliminating the need for costly accident reconstruction

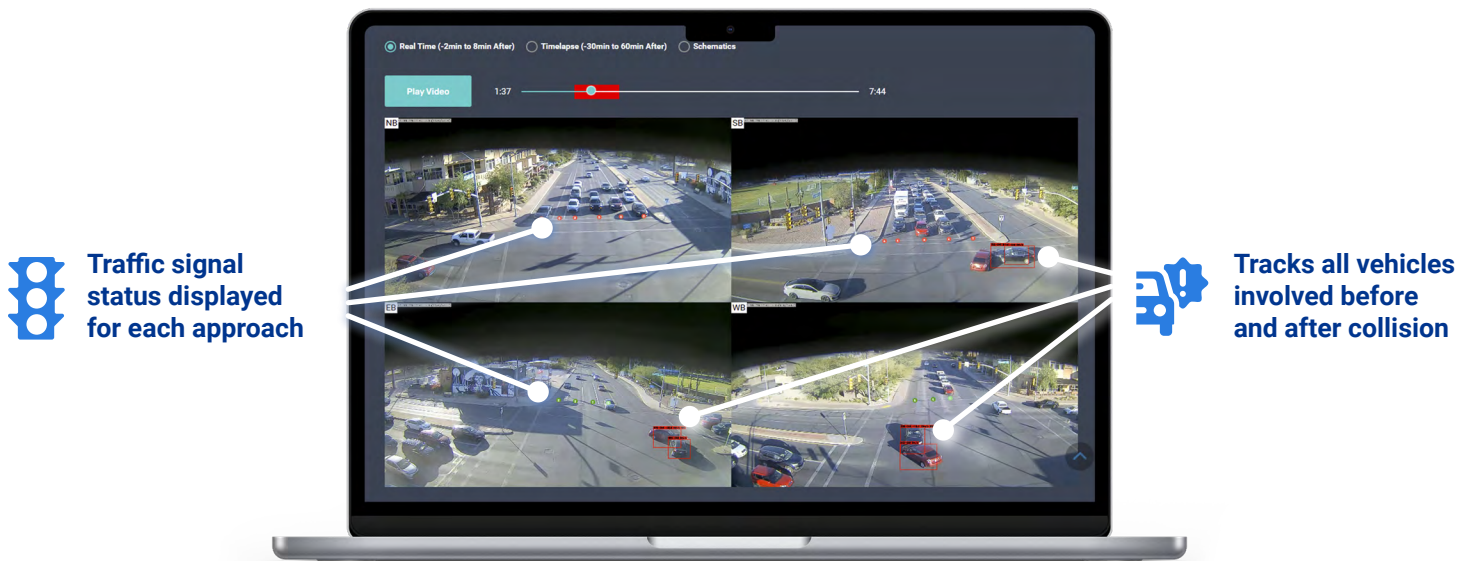

Detect potential fraud early in the claims process for prompt resolution and protection of your bottom line

Identify and accelerate subrogation opportunities, improving recovery outcomes

Early release opportunity

Join select clients in accessing this innovative solution early. You'll benefit from advanced features while helping shape future enhancements as we expand intersection coverage and add more video sources.

Powerful features that speed resolution

- Clear liability evidence
- Continuous traffic signal status displayed for each approach
- Precise vehicle speeds shown before accidents and at impact
- Up to one hour of post-accident footage capturing emergency response and occupant behavior

Seamless integration

- Video available within two hours of incident
- No IT lift or setup required
- Alerts embedded within ClaimSearch
- Intuitive interface requiring only minutes to learn

Reliable performance

- High-quality footage regardless of weather or time of day
- Accessible through your existing ClaimSearch workflow
